

ANUCRYL HA-120

TECHNICAL DATA SHEET

INTRODUCTION	ANUCRYL HA-120 is an associative thickener based on a hydrophobically modified alkali swellable emulsion (HASE). ANUCRYL HA-120 is swellable with alkali, and by associative mechanisms above pH of 8. Recommended for medium shear paints where reduced syneresis, improved water resistance, good flow, and enhanced microbial resistance are desired. Superior spatter resistance compared to cellulose ethers																					
APPLICATION	ANUCRYL HA-120 can produces paints with stable viscosity during long term storage, excellent tropical stability and freeze-thaw stability. It is suggested for high viscosity paints, higher PVC water-borne coating like putties, flat and silk paints
