## Technical Data Sheet Aluminium Paste for waterborne application

PRODUCT: EM2015

SOLIDS : 65% min

Fineness :  
-45mic : 95.00% min

Average Particle Size:  
D50 Value: 22±2µm  
Malvern Mastersizer 2000

Carrier : Proprietary Medium

EM2015 is a fine-medium range aluminum pigment for waterborne applications. It is a cornflake type of particle geometry. It is reasonably well passivated under the condition of usage described. The paste medium of EM2015 is suitably designed for its dispersion versatility and Particle alignment. Though these products contain necessary passivating chemicals, care must be taken during formulation. The paste is suitable for waterborne paints and inks.

It is recommended to keep the container closed as well as away from any flame, spark or heat. Store it in a cool and dry place with adequate ventilation. Do not keep an opened drum in storage. For best results it is recommended to consume the product as quickly as possible. The Manufacturer is not liable and shall not be held responsible for any issues on the product damage if the drums are opened.
